## What is this course?

**Course description: (3:3:0) This course is about YOU.** This course is designed to help you create greater success in college and in life. This is achieved by helping students explore who they are, understand where they come from, and decide where they are going. By applying the strategies of active learning, self-motivation, self-management, self-awareness, and interdependence you will create greater academic, professional, and personal success. The most important part of this course, however, is learning more about yourself. You will learn who you are as a college student and human being, and you will learn what it takes for you to keep yourself balanced and on course for success.

This course is a study of the 1) research and theory in the psychology of learning, cognition, and motivation, 2) factors that impact learning, and 3) application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of college-level student academic strategies. Students use assessment instruments (e.g., learning inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are expected to integrate and apply the learning skills discussed across their own academic programs and become effective and efficient learners. Students developing these skills should be able to draw continually from the theoretical models they have learned. This course is recommended for all students, especially nontraditional students and students on academic probation and is required for students returning to college after academic suspension or by placement by the Admissions Committee.

<sup>3</sup> Catalogs and Student Guides are accessible online at the college website (<http://www.southplainscollege.edu>).

This course is about learning more about yourself (your strengths, preferences and weaknesses) so you are more successful at everything you do.

**Course purpose:** The purpose of this course is to prepare students for college and life success, equipped with knowledge, skills, strategies, and tools to apply to accomplish a variety of tasks in varying contexts.

**Course philosophy:** Everyone is important and has something to say and contribute to the course. There are no secrets. There are no victims. There are no solos. This course is based on a value system of focused attention, personal responsibility, integrity, risk-taking, contribution and teamwork.

**Learning Outcomes:** Learning outcomes are observable, measurable, and performed by students.

Construct a personal learning system informed by the research and theory in the science and psychology of learning, cognition, and motivation.	Students will read about how learning works, metacognition, victim/creator mindsets, the growth mindset, and complete associated homework assignments, and discussion/journal reflections. Students will identify their personal strengths and weaknesses as a strategic learner and apply their knowledge to classroom learning through discussion and journal posts. Students will demonstrate the use of learning strategies and study skills by taking notes and applying reading and study strategies and completing associated homework assignments and digital exercises. Students will learn cognitive and metacognitive strategies to increase college academic success.
Identify factors that impact learning and apply techniques and strategies to achieve personal, financial, academic, and career success.	Students will take a variety of assessments to identify and understand what motivates their learning (e.g., LASSI, MBTI, VARK, multiple intelligences), as well as the unique ways in which they learn. Students will reflect on these measures in discussion/journal prompts, homework assignments, and the final reflection success paper. Students will also complete homework assignments relevant to financial, personal, academic, and career goals, culminating in a final reflection paper.
Develop an educational and career plan based on individual assessments and exploration of options.	Students will work throughout the semester to develop education and career plans, including setting up advising sessions, taking career assessments, planning their academic semester, conducting career research, completing relevant homework, reflecting in discussion posts, and completing a final and reflecting on the connections between career and academic goals. Additionally, students will identify and file the appropriate degree plan with proper advisement, write and prioritize short-term and long-term goals related to their time at South Plains College, and explore career options incorporating the use of related assessments and tools.
Identify and understand how soft skills are directly correlated to personal, academic, and career success.	Students will read and learn about important soft skills, including how to accept personal responsibility, discover self-motivation, master self-management, employ interdependence, gain self-awareness, develop emotional intelligence and teamwork. This will be done through homework assignments, digital exercises, discussion posts, journal reflections, and the final reflection paper.

# My Grade: How and What?

**Grading scale:** Your grade will be determined by the following:

**Assignments = 50%** [Exams and projects count 3 times as much as daily assignments.]

**Attendance and Participation = 50%** [If you have more than 6 absences, I advise you to consider dropping the course. Students with excessive absences rarely make an acceptable grade in the course.]

**I WILL NOT DROP YOU FOR NOT ATTENDING THE COURSE AND/OR NOT DOING THE ASSIGNMENTS.**

## FOMO

**Miss class and fail the course**

Grades are based on the following scale:

90 to 100 = A

80 to 89 = B

70 to 79 = C

60 to 69 = D

0 to 59 = F

**Make-up Policy:** You may make-up assignments, following these guidelines:

- \*You will have one week from your last absence to make-up missed work.
- \*You must contact me about your absence;
- \*You **DO NOT** need a doctor's note, but you do need to communicate with me about your absence;
- \*If you do not contact me about being absent/being sick, you may not make up missed assignments.

***When you send an assignment as an email attachment, identify the file with the name of the assignment and your name; for example, EXAM1yourlastname, initial first name. Be sure to include your name on all your assignments.***

**Academic Integrity:** It is the aim of South Plains College to foster a spirit of complete honesty and a high standard of integrity. The attempt of any student to present assignments which he or she has not honestly performed is regarded as a serious offense. If another student has provided the work, that student is equally at fault. Offenders are liable to the consequences for cheating and plagiarism as described in the SPC catalog in sections, "Academic Integrity" and "Student Conduct." Consequences can range from an F in the course to suspension from the college.

**Do not, under any circumstances, turn in another student's work as your own. Do not, under any circumstances, give your work to anyone else to turn in as his/her own. Both situations are representative of academic dishonesty and will be treated as such.**

**Reflection Paper General Instructions and Rubric**

**Purpose:** Throughout your education, you will be expected to provide evidence that you both understand material and have certain knowledge and skills. One way of doing this is to produce a well-written and thoughtful response to important questions and issues facing both you as an individual and society as a whole. Therefore, you will be asked on several occasions and in several different courses to develop reflective responses on various topics.

**Topic:** As a result of all the assessments and assignments you have done in this course, what have you learned about yourself? What are your learning strengths and weaknesses? How will you improve? What are your personality strengths and challenges? How will you improve?

**Format:** A reflection paper should be 2-3 pages long, typed, double-spaced and in a 12 point regular font (such as Times New Roman or Arial) with one-inch margins. This paper should reflect your thinking process about the questions posed and will be used as proof of your understanding of yourself as revealed by the assessments and concepts and issues discussed in class.

**Grading Rubric:** The following rubric will be used to evaluate your work.

## EDUC 1300 Career Profile

A **Career Profile** is a paper about a person in the career field or occupation that you have chosen or are interested in learning more about. Dave Ellis, author of *Becoming a Master Student*, has identified qualities of a master student; he says the qualities are *inquisitive, able to focus attention, willing to change, able to organize and sort, competent, joyful, able to suspend judgment, energetic, well, self-aware, responsible, willing to take risks, willing to participate, a generalist, willing to accept paradox, courageous, self-directed, spontaneous, relaxed about grades, tech savvy, intuitive, creative, willing to be uncomfortable, optimistic, willing to laugh, hunger, willing to work and caring.*

Make an appointment to interview a person in your chosen field and ask her or him what s/he thinks about these qualities and if they apply in your chosen career. Ask which of these characteristics/qualities are more important in that career. Ask about her/his accomplishments in life and the greatest lessons he/she has learned. After the interview, decide which of the qualities you see most strongly in that individual. Write a Career Profile about this person to share with the class.

**Format:** Your Master Student paper should be 1-3 pages long, typed, double-spaced and in a 12 point regular font (such as Times New Roman or Arial) with one-inch margins. This paper should reflect your understanding of the assignment and why you chose this person for your **Career Profile**.

**Grading Rubric:** The following rubric will be used to evaluate your work.
