

South Plains College

MATH 2415 –Calculus III

{ Section 001, T R 8:30 – 10:35 am
{ Section 200, T R 5:20 – 6:55 pm

{ Math Bldg., Rm. 105
{ Reese, Rm. 211 , respectively

Instructor: Miss S. Davis
Office: 103 MATH Bldg.
Phone: (806) 894 – 9611 ext. 2699
E-mail address: sdavis@SouthPlainsCollege.edu

Office Hours:

Monday	Tuesday	Wednesday	Thursday	Friday
9:30 – 11a 3:30 – 4:30p		9:30 – 11a		9 – 12 p 8 – 9 a (Advising only)
or by appointment				
At the times with this designation, I will be in my office to help you. You do not need an appointment to come see me at these times. When you come, I will be doing something else, but I will stop and help you. I am available at other times, but please give me a call before coming to make sure I am there.				

Text: Calculus, 10th edition by Larson & Edwards (ISBN: 978-1-285-05709-5)

Supplies: Scientific calculator (preferably a TI-85 or higher), (at least a 2.5 in ring) notebook, hole puncher, stapler, & a staple puller.

Purpose: To provide a transferable course in Calculus III, to lay a foundation for the study of Differential Equations, and other more advanced mathematic &/or engineering courses.

Prerequisites: MATH 2414 (Calculus II) and, strategically, Analytical Geometry

Attendance: Attendance and effort are the most important activities for success in this course. Records of your attendance are maintained throughout the semester. If your lack of attendance (i.e., excessive absences) is determined by the instructor to put you at risk of failing the course, you may be dropped from the class with a F as a final grade. Excessive absences consist of two consecutive weeks or 4 cumulative days. If you unfortunately happen to incur an absence, please contact the instructor either by phone or email and refer to the website to get and attempt the assignment before the next class. Please read the “Drops and Withdrawals” policies in the current South Plains College catalog.

Assignment Policy: Homework will be assigned daily and taken up periodically to be graded. Late homework is not accepted. Homework is to be completed and be kept in a notebook that must accompany you to each class session. Refer to Blackboard for the homework procedure and others to be used in this class.

Blackboard: A plethora of information for this class will exist on Blackboard such as syllabus, homework, etc. Please be responsible to log in to Blackboard and navigate to the appropriate site for this class.

Assessments: There will be quizzes given over the assigned homework in which no make-ups will be allowed.

Tests: There will be three (possibly four) tests and a comprehensive final. If the final exam score is greater than any non-zero major exam score then the final exam score replaces the major exam score. In other words, the major exam score will be deleted and the final exam score will count two times (Honest Effort Rule (H.E.R.) policy).

Make-up Policy: There is no automatic provision for making up exams. Only under extreme circumstances (e.g., death in the family or hospitalization) will make-up exams be given, and these circumstances must be documented. If at all possible, the instructor should be notified prior to missing an exam.

Grading Score: Final score =
$$\frac{\text{Test 1} + \text{Test 2} + \text{Test 3} + \text{Homework Score} + \text{Final Exam score}}{5}$$

Borderline Grades: These grades will be evaluated with regard to attendance and mature conduct in class.

STUDY: You should normally spend approximately 2-3 hours outside of class in study for each hour of lecture. Try to study the assigned lesson as soon after the class meets if possible. Additionally, read the book as the semester progresses! Refer to the “How to Study” sheet for further detailed studying suggestions.

Tutoring: Free tutoring is available in the Math-Engineering building (room M116). Please remember to sign in when you seek help from a tutor.

Video Tapes: Videotapes for many review topics in this course are available in the Math. Department AVT lab (Rm. 116 of the Levelland campus). The web address for the online videos is as follows (<http://spc.blackboard.com/webct/entryPageIns.dowebct>). For username and password, please use *mvideos*. For the AVT lab on the Levelland campus, students are allowed to check the tapes out, view them in the office, or duplicate them with the equipment available in Rm. 116.

Tape	Topic
Analytical Geometry	
310	Parabolas
320	Ellipses
325	Hyperbolas
	Parametric Equations
335	Polar coordinates
Calculus III	
485	Double Integration
490	Double Integration with Polar Equations

Critical Dates:

Jan 16	MLK, Jr.	April 19	WEB Pre-registration for Summer & Fall 2017	
March 13 – 17	SPRING Break			
April 17	Easter	Final Exams		
April 7	UIL – No office hours	Section 001	May 9	(8 – 10 a, Tuesday)
April 27	Last day to drop	Section 200	May 9	(5 – 7 p, Tuesday)

Student Responsibilities:

- Attend class, be aware of announcements made in class, and ask questions when necessary.
- Work homework problems the day that they are assigned.
- Form study groups.
- Get help from tutors, tapes, and/or the instructor.
- ****Please, turn off cell phones and pagers during class! ****
 - If the instructor determines that activation of a cell phone, pager, PDA, or laptop interrupts the lecture or classroom discussion or impedes the progress of any student then the instructor will ask the student to leave the class temporarily or permanently.
 - **No technologic devices such as cell phones, PDA's, etc. are to be used during tests or in-class quizzes.**
- **In addition to the No Food or Drink classroom policy and in accordance to campus policy, no tobacco products are to be permitted and consumed in class.**
- **You will obtain your final grade for the class through MySPC and CampusConnect.**

Cell Phone Policy: All students will, during each class period and for its duration, place and keep their cell phone, provided that they are at the present time in possession of said device, face-down in the right-hand corner and on the top surface of their desk. If a student's cell phone activates and/or the student engages in text messaging during class at anytime during the semester, the student, by the instructor's discretion, could be permanently dismissed from the class for the remainder of the semester. If a student's cell is activated during class and/or the student engages in text messaging determined by the instructor, and **the student chose not to place their phone on top of their desk as mentioned above** then the student will be dismissed from the class by the instructor permanently.

Academic Misconduct: Complete honesty is required from students in all facets of course work including homework assignments, tests, and the final exam. See the South Plains College Catalog for more detail.

Sanctions for Cheating or Plagiarizing: A grade of "F" in the course will be assigned to any student caught cheating or plagiarizing; additional sanctions may also be considered. Students are responsible for understanding the meanings of the words cheating and plagiarizing.

Special Requests: If you happen to become *ill* during the semester, please respect your instructor and your classmates by making your best effort to keep your germs to yourself.

Questions: I invite all your questions **except** the following:

1. I wasn't able to make it to class. Did I miss anything? (Yes.)
2. Is this going to be on the test? (Perhaps, not directly, but if the ideas were not important, I would not be discussing them in class.)
3. Do you have the tests graded? (I put forth my best effort to have the tests graded so as to return them the next class session. However, there are times due to uncontrollable factors that this may not be possible.)

Objectives: Upon completion of this course and obtaining a passing grade, the student will have mastered at least 70% of the course objectives. The course objectives provide that the student be able to:

- | | |
|--|--|
| a.) Calculate derivatives of parametric and polar functions; | b.) Calculate anti-derivatives of parametric and polar functions; |
| c.) Calculate dot and cross product; | d.) Write equations of lines and planes in space using vector analysis; |
| e.) Find maximum, minimum, and level curves of 3 D graphs; | f.) Work with multivariable functions and calculate partial derivatives; |
| g.) Perform double and triple integration; | h.) Green's Theorem; |
| i.) Find area, volume, arc length, and surface area by use of double and triple integration. | |

Diversity: In this class, the teacher will establish and support an environment that values and nurtures individual and group differences and encourages engagement and interaction. Understanding and respecting multiple experiences and perspectives will serve to challenge and stimulate all of us to learn about others, about the larger world, and about ourselves. By promoting diversity and intellectual exchange, we will not only mirror society as it is, but also model society as it should and can be.

Disability Statement: Students with disabilities, including but not limited to physical, psychiatric, or learning disabilities, who wish to request accommodations in this class should notify the Special Services Office, preferably, early in the semester so that the appropriate arrangements may be made. In accordance with federal law, a student requesting accommodations must provide acceptable documentation of his/her disability to the Special Services Coordinator. For more information, call or visit the Special Services Office in the Student Services Building, 894-9611 ext. 2529.

Course Outline		
This schedule is tentative and subjective to change. Changes will be announced in class.		
Week	Topics and Sections Covered	
	1/16, Mon	<i>MLK, Jr.</i>
1	1/17, Tues	Introduction <i>Parabolas & Ellipses</i> *10.1 <i>Conic Sections and Quadratic Equations</i>
	1/19, Thurs	Ellipses contd. & Hyperbolas Relative Extrema (Review) (Student responsibility) Area & Volume (Review) (Student responsibility)
	1/24, Tues	Parametric Equations – Graphing Parametric Equations – Derivatives and Tangents
2	1/26, Thurs	Parametric Equations – Relative Extrema Parametric Equations – Area, Arc Length, Volume, & Surface Area
	1/31, Tues	Polar Equations – Coordinates & Equations Polar Equations – Graphing
3	2/2, Thurs	Polar Equations – Graphing Intersections Polar Equations – Area & Arc Length
	2/7, Tues	<i>11.1 Vectors</i> <i>Operations on Vectors</i> <i>Trigonometric (Polar) Form of Complex Numbers</i> <i>Vectors in Space</i>
	2/9, Thurs	TEST 1
5	2/14, Tues	11.3 Dot Products 11.4 Cross Products
	2/16, Thurs	11.4 Cross Products contd. Resultant Vectors
6	2/21, Tues	Resultant Vectors contd.
	2/23, Thurs	11.5 Lines and Planes in Space (Equation of a Line & Plane and Distance from a point to a Line and Distance from a point to a Plane, the intersection of lines & planes, and angle between two planes)
7	2/28, Tues	12.1 <i>Vector-Valued Functions</i> 12.2 <i>Vector-Valued Functions – Calculus</i> 12.3 <i>Velocity & Acceleration</i> 12.4 <i>Tangent & Normal Vectors</i>
	3/2, Thurs	TEST 2
8	3/7, Tues	12.5 Arc Length & Curvature
	3/9, Thurs	12.5 Curvature contd. (Torsion & TNB frame)
	3/13 – 3/17	<i>Spring Break</i>
9	3/21, Tues	11.6 <i>Surfaces in Space (Cylinders and Quadric Surfaces)</i> <i>Space Coordinates & Surface of Revolution</i>
	3/23, Thurs	TEST 3 11.6 <i>Surfaces in Space (Cylinders and Quadric Surfaces) contd.</i> <i>Quadric Surfaces</i>
10	3/28, Tues	11.7 <i>Cylindrical and Spherical Coordinates</i>
	3/30, Thurs	13.1 <i>Functions of Several Variables</i> 13.3 <i>Partial Derivatives</i> 13.5 <i>The Chain Rule: Implicit Differentiation (only)</i> 13.6 <i>Directional Derivatives & Gradients</i>

		Course Outline		
		This schedule is tentative and subjective to change. Changes will be announced in class.		
Week		Topics and Sections Covered		
11	4/4, Tues	13.7Tangent Planes & Normal Lines 13.8Extrema of Functions of Several Variables 13.9Applications of Extrema of Multivariable Functions		
	4/6, Thurs	13.10 Lagrange Multiplier		
12	4/11, Tues	14.1Area in the Plane (Double Integrals) 14.2Double Integrals & Volume 14.3Polar Coordinates – Double Integrals		
	4/13, Thurs	TEST 4		
	4/17, Mon	<i>EASTER</i>		
13	4/18, Tues	14.3Polar Coordinates – Double Integrals contd. 14.4Centers of Mass & Moments of Inertia 14.5Surface Area		
	4/20, Thurs	14.6Triple Integrals in Rectangular Coordinates 14.7Triple Integrals in Cylindrical and Spherical Coordinates		
14	4/25, Tues	14.8Jacobian		
	4/27, Thurs	15.1Vector Fields 15.2Line Integrals		
15	5/2, Tues	15.3Conservative Vector Fields & Independence of Path 15.4Green's Theorem		
	5/4, Thurs	<i>Review for Final</i>		
16	5/9, Tues	<i>FINAL EXAM:</i>	001	8 – 10 a
	5/9, Tues		002	5 – 7 p
